

Geography Subject Leader Development Meeting

Thursday 19th March 2020

9:15am – 3:30pm

The Keyworth Centre, Lincoln, LN6 0EP

COURSE AIM:

This course will help geography teachers and subject leaders explore Geographic Information Systems (GIS) and integrate them into KS3, GCSE and A-Level Geography curriculums. In the first session the rationale, theory and use of GIS is explored (including the wider world), contextualising the data-driven age in which students now live. In the second session the focus is on GIS as part of the Key Stage 3 Geography curriculum, where numerous GIS-based resources and activities will be showcased. Similarly, in the third session the focus turns to integrating GIS into GCSE and A-Level. In the final session there will be the chance to collaborate and work on embedding GIS into geography curriculums – **participants are encouraged to bring long- and medium-term curriculum plans and a laptop.**

COURSE LEADER:

Aidan Hesslewood is Head of Geography at Spalding Grammar School. For a number of years he has worked with the Geographical Association as a consultant, a leader of international secondary geography CPD, and a moderator of the Secondary Geography Quality Mark. He is also on the editorial board of *Teaching Geography* (a GA publication), and part of the *GeoCapabilities Sustainability Group*. He is founder and chair of *Geolincs*, the GA branch for South Lincolnshire, and was awarded the Ordnance Survey Award 'for excellence in geography education at the secondary level' by the RGS-IBG in 2018.

Cost per delegate:

Alliance Members: £70

Non-Alliance Members:
£70

Alliance Members only
– All 3 sessions: £150
